WORK EXPERIENCE

SDE-2

Solar Square Energy

10/2024 - Present

Achievements/Tasks

- **Leading the ERP POD at SolarSquare**, spearheading the development, scaling, and transformation of ERP into a distributed, cloud-native architecture on AWS (including AWS Lambda), ensuring resilience, scalability, and enterprise-grade performance across supply chain, finance, and warehouse operations (B2B & B2C).
- Engineered and integrated **mission-critical backend systems**, including **banking/payment APIs**, **AMC lifecycle automation**, and an **Order Management System (OMS)** —enabling seamless financial transactions and end-to-end order automation across B2B and B2C channels.
- Enhanced data visibility and backend reliability by building **inventory tracking workflows** and **data pipelines** that identified and prevented ~₹10 Lakhs of mid-mile logistics losses, improving operational transparency and warehouse efficiency.
- **Implemented DevOps and observability best practices** by integrating Kibana for logging and building an automated CI/CD pipeline with GitHub APIs and LLM-powered (ChatGPT) code reviews, improving developer velocity, code quality, and release efficiency.

Associate Consultant

DataCurate Technologies

06/2022 - 10/2024

Achievements/Tasks

- **(HDFC - ERGO)** Engineered a sophisticated supervised machine learning algorithm to strategically target WhatsApp communications to individuals with an elevated probability of lead generation, resulting in a 70% reduction in messaging costs and a significant enhancement in lead conversion efficacy.
- Collaborated with Marketing and Development teams to establish a robust data pipeline, optimizing communication channels for email, SMS, and WhatsApp marketing. Achieved a remarkable 6% boost in lead conversion rates.
- **(Star Health Insurance)** Experienced Data Engineer in ETL, Developing Detail Data Store (DDS), Automation Scripting, Reports Development, and Analytical Dashboards using SQL & SAS-based technologies in a production environment.
- Assisted in fraud detection mechanisms leveraging data warehousing and algorithms, supplemented by the application of customized rule sets to APIs.

SKILLS

Python

Frappe

ERPNext

SQL

JavaScript

ETL

HTML/CSS

Git / GitHub

SAS

AWS

Flask / Fast API

GEN AI

Docker

DSA

EDUCATION

B.E. Information Technology
(07/2018 - 06/2022)

Mumbai University

CONTRIBUTIONS

Open Source Contributions

Optimized ERPNext core Stock Ledger serial and batch resolution, achieving a **~7× performance improvement** on queries over **large-scale inventories (millions of ledger entries)** while preserving backward compatibility with legacy purchase and landed cost workflows.

Amba Tech (NGO), (03/2020 - 03/2022)

Designed and developed an ERP system integrated with Angular (Web App), Mobile App and Metabase (Dashboards) for an event management team. The system optimized resource utilization and streamlined event organization. Implemented a robust QR-based attendance system to enhance precision and support data-driven decision-making. Utilized Frappe API for seamless internal data interaction and integration. Skilled in developing custom scripts and query reports for enhanced data analysis and reporting capabilities.
